

# SECURE ACCOUNT MANAGER ENGLISH GUIDE

With this app you can save your passwords safely with a database protected by a double encryption key.

You can save your passwords by setting a label (name) to remember which password it refers to, search for it, copy its contents if you need to paste it into a web page on your smartphone.

If you need it, you can export all your passwords in csv format or import your own archive within the app.

### FIRST ACCESS AND PASSWORD SETTIING

Only in the first access you must choose the password of access which you will always use unless it is changed by the internal menu.
